DETAILED ACTION

1. Applicant's election without traverse of Invention Group I, claims 1-25, 52, 55, 57-58, 61 and 100; and species of group (1): alpha-hydroxy acids, lactic acid, alpha-hydroxy decanoic acid, alpha-hydroxy octanoic acid, malic acid, tartaric acid and mandelic acid in Paper No. 15 submitted January 16, 2002 is acknowledged.

2. A further restriction is required as follow.

Restriction/Election

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-25, 52, 55, 57, 58 and 61 drawn to a composition for treating skin irritation, classified in class 424, subclass 678, 682+.
- II. Claim 100, drawn to a method for treating skin irritation, classified in class 424, subclass 678, 682 +.

2. Inventions Group I and Group II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process as claimed can be practiced with another materially different products such as the products containing sodium or potassium hydroxide.

3. If applicants elect group I, following species election would be required.

Art Unit: 1617

4. The species election requirement in paper No. 13, mailed June 12, 2001 is withdrawn in favor of the following species election requirement.

5. This application contains claims directed to the following patentably distinct species of the claimed invention:

The irritants in the composition: a) organic acids. Claims 13-19 and 21, b) retinoids, claim 19; and c) benzoperoxide; claim 20.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-12, 22-25, 52, 55, 57-58 and 61 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
